Mobile : +91 9449982572

Education

- **Sir M. Visvesvaraya Institute of Technology** Bengaluru, India
B.E. in Electronics and Communication; CGPA: 8.5/10.0 2024

Experience

- **Harman International** Jan 2025–Present
Software Engineer
 - Develop and maintain Android Automotive IVI applications for HVAC, including climate, temperature control, seat ventilation, and massage functionality.
 - Integrate new features and carline-specific customizations for Drive Modes, HVAC, and Seats across HMI and middleware layers.
 - Contribute to input device handling by maintaining Hardkey and Command Manager functionality for key event handling.
 - Validate feature integration and functionality using CAN tools such as PCAN and Vector CANoe, and support diagnostics through AIDL-based Inter-Domain Communication between Android and Integrity OS (between Vehicle and Driver Domain).
 - Resolve defects, enhance existing functionality, and improve the stability and maintainability of production IVI automotive applications.
- **EGDK India Pvt. Ltd.** Aug–Nov 2024
Software Developer Intern
 - Developed MuleSoft APIs and automated data workflows to integrate internal tooling with Salesforce.

Skills

- **Programming Languages:** Java, Kotlin, Python, JS, C/C++
- **Database Management:** PostgreSQL, Firebase
- **Android Development:** Java, Kotlin, AIDL, Jetpack Compose
- **Linux and Other Tools:** Shell Scripting, Docker, Oracle Cloud, Vector CANoe, PCAN, DiagAlyser

Projects

- **PingMe**
 - A secure self-hosted Android realtime messaging application featuring real-time messaging, media sharing, and WebRTC-based voice/video calling. Built with Jetpack Compose, Node.js backend, PostgreSQL database, and TURN server hosted on Oracle Cloud Instance to enable secure and reliable peer-to-peer connectivity.
- **Expenzz**
 - A simple, easy-to-use expense logging and management Android application built with Firebase Authentication and Firebase Realtime Database.
- **Portfolio**
 - Personal website showcasing technical projects, professional experience, and engineering skills.

Hobbies

- **Homelabbing:**
Self-hosting applications and experimenting with Linux servers, Web OS, Docker, networking, reverse proxies, DNS, VPNs, and cloud infrastructure. I Self host most of my day-to-day tools and services.
